

# Managing diabetes just got more affordable.

If you're one of the 38 million Americans with diabetes, the insulin you need can get expensive.<sup>1</sup> **Good news—starting January 1, 2024, we're reducing the cost of several commonly prescribed insulin medications. You're getting the same quality drug for a lower price.** Now you can pick up your covered insulin prescriptions from your local participating pharmacy, or have them quickly delivered to your home, **for as low as \$0 out of your pocket.**<sup>2</sup> This change may save members an average of \$40 for a 30-day supply.

**See the list below for medications.**

Insulin	
Rapid-Acting	Long-Acting
Fiasp	Insulin degludec
Insulin aspart	Insulin glargine
Novolog	Lantus
Short-Acting	Levemir
